Re: Capital Items Description Memo FY 2020
Date: February 28, 2019

ARTICLE I – POLICE

New K-9 SUV & Changeover Equipment: Staff is recommending replacing the 2015 K-9 SUV with changeover equipment to a 2019 Ford Explorer SUV. The 2015 Ford Explorer has over 90,000 miles. By purchasing a 2019 model, all the equipment from the 2015 model can be transferred, with minor modifications. The request considers the recent cost of SUV cruiser replacements along with the cost to transfer/modify/purchase equipment to outfit the fleet for use and the cost to remove and apply decals as well as trade in value. The total request is \$45,000.

New Patrol SUV & Changeover Equipment: Staff is recommending replacing the 2014 Dodge Sedan with changeover equipment to a Ford Explorer SUV. The 2014 Dodge Sedan has over 125,000 miles and is the oldest vehicle in the fleet as well as the only Dodge. This unit would be a front line patrol vehicle with a current patrol vehicle being reassigned to the Detective. The request considers the recent cost of SUV cruiser replacements along with the cost to transfer/modify/purchase equipment to outfit the fleet for use and the cost to remove and apply decals. The total request is \$50,000.

Special Enforcement Boat and Motor: Staff is recommending replacing the Special Enforcement Boat and Motor. The existing MRCO Boat and Motor has been in storage for the last year and half, since combining the two departments (Harbormaster & Special Enforcement). This appropriation will allow for the sale/trade-in of the existing boat and motor and the purchase of a smaller unit, with trailer as there is no longer a need for two “larger” boats. This would give flexibility to the MRCO to enter smaller bodies of water currently inaccessible by the Harbor Boat. The total request is \$5,000.

Bullet Proof Vest Replacement: Staff is recommending replacing bullet proof vests, pursuant to the present contract with the union, where the town agreed to provide all officers with a protective vest. Industry standards suggest that the vests be replaced every 5 years. Our last purchase of vests was in 2015. Federal grant funds will be pursued to cover up to 50% of the purchases, and the remainder will come from reserves. The total request is \$10,000.

ARTICLE II – FIRE

Chief’s Vehicle Replacement: Staff is recommending removing the purchase of a new Fire Chief’s vehicle from the FY20 plan and deferring it to FY22. Chief feels the vehicle can handle additional mileage for a couple more years and as a contingency, should it not; the service truck could be used in the interim until such vehicle can be appropriated through the capital plan.

ARTICLE III – RESCUE

Rescue Replacement: Staff is recommending replacing Rescue 5 (2012) with a heavier pick-up truck chassis with 4-wheel drive, eliminating the need for the On-Spot chains, which have been poor performing. The replacement will allow our fleet to be modernized and will be equipped with five-point harnesses to increase crew and patient safety. The total request is \$250,000.

Office/Dormitory Improvements: Staff is recommending moving the billing operation to the Annex Building after proper fire separation from the shop below, to be in compliance with fire code which requires a one-hour separation due to the presence of machinery, fuels and other shop contents. Staff would be looking to designate half of the Annex Building for the Emergency Operations Center (EOC), and the remaining half will be used as a billing office and secure records storage. This would put us in compliance with HIPAA regulations in ensuring the protection and privacy of individual medical records and other personal health information. This move will also relocate the dormitory space to the fire station itself, dividing the office space into a code-compliant bedroom and provide for better response times. The total request is \$35,000.

ARTICLE IV – PUBLIC WORKS

Wood Chipper: Staff is recommending the removal of the appropriation for the wood chipper. In FY15, there was \$10,000 appropriated to refurbish the wood chipper and since that time the chipper has shown very little wear. Staff is comfortable removing this from the current year appropriation, but will bring it back when there are signs of substantial wear, with a 2-3 year notice before it is due for replacement.

Truck Chassis Replacement, Plow and Wing: Staff is recommending replacement of the 2008 Sterling single axle plow truck (Truck #9). This truck has begun to have some major mechanical issues over the past year and currently needs some repair work. Staff is hoping to replace this truck before putting too much money into it. Sterling no longer makes this model and it is becoming increasingly difficult to acquire parts for repairs. This is the last of the steel dump body trucks within the fleet, all current trucks are stainless steel to lengthen the life of the beds, reduce maintenance, and reduce the rusting from winter operations. The total request is \$150,000

ARTICLE V – SOLID WASTE/RECYCLING

Bulky Waste Containers: Staff is recommending replacing the two bulky waste containers. They are approximately 10 years old, have rusted bottoms, and are becoming increasingly unsafe for transport. The total request is \$17,000.

ARTICLE VI – COMPREHENSIVE TOWN IMPROVEMENTS

Reserve Removals: Staff is recommending the removal of the Route 1 South Park-n-Ride Paving and the paving at the Recycling Center work area. As well as moving the Grant Road Reconstruction to FY21 to align with our neighboring community of Durham, who is currently trying to obtain funding for their portion of Grant Road so that both ends can be done at the same time.

Public Works Rear Parking Area Paving: Staff is recommending the paving of the rear parking area at the public works facility. This work is needed to correct a drain issue being experienced around the salt shed and the parking area for the plows and related gear. The total request is \$40,000.

Percy, Pownal, and Pratt Road Reconstruction: These three roads are in need of full reconstruction which includes drainage improvements, existing pavement grinding/ reclamation, shim gravel, and 4" depth of new pavement. The roads are structurally failing, beyond the stage of maintenance repair, with broken pavement in places. The total request is \$75,000.

Concord Gully Brook Watershed Restoration: Concord Gully Brook is one of two streams in the town designated as urban impaired by the Maine DEP because they do not meet the state's water quality standards. The Town was awarded a Phase 1 grant from the Maine DEP in 2016 to restore 850 linear feet of degraded stream behind Concord Road. A Phase 2 grant was recently awarded to the Town also by the Maine DEP to continue watershed restoration efforts where the 36" diameter West Street culvert outlets into a stream tributary to the main stem and at two roadside drainage swales. The grant also proposes addressing the chloride problem through local ordinance changes. This Phase 2 grant requires a 50% local match by the Town. Staff proposed to increase the FY19 request by \$50,000, while reducing the FY22 & FY23 requests by a matching amount. This allowed us to further the stream restoration effort by leveraging matching grant funds from Maine DEP in FY19 & FY20, while spending the same amount over a five year period. The total request is \$50,000.

Culvert Replacement: Staff is recommending replacing two culverts, One on Lower Mast Landing and one on Pownal Road. Both of these culverts are large in diameter with deep excavation. There is also a \$20,000 overrun on the previously appropriated Hunter Road Culvert replacement that is being factored into this request. The total request is \$55,000.

ARTICLE VII – MUNICIPAL FACILITIES

Computer Upgrades-Town wide: Staff is recommending an upgrade to approximately 15 computers. Staff is maintaining a four to five-year replacement cycle which includes computer hardware, formatting, and labor for installation. Staff is also recommending replacing the existing Library Server. This server was a salvage from the PD and re-purposed for Library use in 2012 (note the physical age of the server is much older than that!). The existing server is not under warranty and has increased energy consumption, given technology changes for a request of \$6,300. The total request is \$28,300.

Copiers: Staff is recommending deferral of the purchase of a copier to FY21. The Town Clerk Copier has over 830,000 copies on it but continues to operate under "good health". In the event of a "mid-year" failure there are limited reserve funds available to repair, if needed.

Furniture Replacement – Town wide: Staff is recommending replacement of office furniture, Town wide. There are still departments that are using "hand-me-downs" from other departments, and some furniture has been repaired so many times, it can no longer be fixed. This request is for replacement of numerous chairs, shelving, filing cabinets, tables, and computer desks. The total request is \$15,000.

Interior Painting: Interior painting is now handled by our Buildings and Grounds staff and is appropriated within the standard operating budget. Staff is recommending removal of this item from the capital plan.

Heating System at the Town Hall: Heat pumps provide both heat and air conditioning in the most efficient way possible. Slowly, the Town has been adding heat pumps to supplement the natural gas system and to reduce the need for inefficient window air conditioning units. Heat pumps run on electricity, so if the Town installs solar, we'll be able to heat and cool the building with the power of the sun. A three phase approach was proposed beginning in FY18 and we were able to complete the project with efficiency savings in two years. Staff is recommending removal of this item from the capital plan.

Library Expansion-Teen Room: The Library staff and its Board has been looking to expand their facilities to include additional square footage to accommodate the 40-50 children that frequent the Library after school, during the school year, for a couple of hours a day. Management Staff feels that is a significant appropriation request given the residential exposure/impact. Staff would like to budget in FY21 an appropriation for a design study to determine if we can “re-allocate” existing space to meet the current need. Staff is recommending removal of this item from the capital plan until the design study is complete.

Voting Booths: Staff is recommending replacing our existing voting booths. The current booths have been in use since the 1980’s and are in need of replacement. They are missing grommets to properly hang the curtains and we currently have to use duct tape to keep the curtains on the frames. In addition, many of the shelves are broken making the booths unstable and difficult to use. Staff is recommending using Inclusion Solutions and purchasing the Franklin booths that consist of four voting compartments, one of which has a lower shelf for ADA compliance and can be used with or without curtains. The request also includes for booth covers to protect the booths while in storage. The total request is \$15,250.

Digitization of Files: Staff is recommending to begin the process of digitization of tax maps and planning/assessing files along with publishing our GIS data to the website. Staff expects this to be a two or three year appropriation. The total request is \$10,000.

Library Siding: Staff is recommending replacing the siding at the Library Building. The current siding is in need of repair and this is the scheduled maintenance to uphold the infrastructure. The total request is \$10,000.

Revaluation Reserve Fund: Each year, the Town Council places money into a capital reserve for the Assessing Department to conduct revaluations. Instead of conducting a full-scale revaluation once every ten years for approximately \$300,000, the assessor does smaller-scale revaluations each year. This allows values to stay more current and any valuation changes to be more incremental; having less of an impact on the residents. Our Valuation Software Provider, VGSI, is migrating from Oracle to SQL Server, subsequently; we will be expending funds from the Reserve Account in FY20 totaling \$23,000, which includes an \$8,000 one time hosting setup charge. Based on the balance within the revaluation fund the total request for FY20 is \$5,000.

ARTICLE VIII – CABLE

Equipment and Other Improvements (CH 14): Each year, the Town Council places money into a capital reserve for the Cable Department to replace/repair equipment. Based on the balance within the reserve fund the total request for FY20 is \$4,000.

HD Equipment Replacement: Staff recommended converting to HD back in FY18 and replaced five cameras, the channel 3 server, three video monitors, two switches, various cabling connectors and tools, and the installation and testing of said equipment. Staff is now ready to begin the second phase of the HD Conversion project and will be looking to do the following for FY20: LED Lighting in Council Chambers, digital audio in both Council Chambers and the Community Center, monitor and computer replacement both at Town Hall and the Community Center, and the purchase of a new portable camera. The total request is 54,600.

ARTICLE IX – BOARD, COMMITTEES, COMMUNITY GROUPS & OTHER REQUESTS

Florida Lake Bog Bridge Replacement: Staff and the Conservation Commission are recommending replacing the remaining bog bridges at Florida Lake. This project began in 2016 where the Town was able to take advantage of a recreational trails program grant where approximately 100 feet of bridges were replaced. This appropriation will allow for the completion of the project and includes 2 weeks of an MCC (Maine Conservation Corps) crew to help construct the bridges. The total request is \$12,575.

PPI Grant Match Rt 1 South Bike/Ped Trail:

Background

As part of the community planning process for the Cousins River Bridge (CRB) project, the Towns of Yarmouth and Freeport jointly requested that Maine DOT include a dedicated bicycle/pedestrian facility as part of the bridge replacement plan. As a result of this request Maine DOT has expressed an interest in the future plans of both communities to connect future bicycle/pedestrian facilities on each side of the proposed CRB project. The Town of Yarmouth has been planning for some time to extend the Beth Condon Parkway to the northeast of its current end point, toward the CRB and the Freeport town line.

Around the same time, several coinciding discussions had occurred at various levels of Freeport Departments and Boards. Various discussions at the Project Review Board, Planning Board, and the Active Living Committee had focused on the possibility of constructing a dedicated multi-use path roughly paralleling Route 1 South between the CRB and Exit 20. The Planning Department also had convened a meeting of a group of stakeholders along Route 1 South to discuss the possibility of such a dedicated multi-use path. Around this time, Maine DOT met with Freeport and Yarmouth town staff and volunteers to inform the towns of the availability of state Planning Partnership Initiative (PPI) matching grants in the amount of up to \$50,000 that are available, and suggested that these grants would be a good fit to help plan the potential future construction of dedicated multi-use paths and/or bike/pedestrian facilities on both sides of CRB project.

Project proposal

The project seeks to match a \$50,000 Maine DOT PPI grant with a required match of up to \$50,000 in local contribution. The total project would be an amount of up to \$100,000. It is possible that the total project cost would be less than \$100,000. If that is the case, the local match amount would be proportionally lower, but would still constitute 50% of the total project cost.

The intent of the project would be to hire a qualified contractor through an RFP process to perform design study for a proposed dedicated multi-use path along Route 1 South between the CRB and Exit 20/Desert Road. The preferred route of the proposed multi-use path would be set off Route 1 to the southeast, preferably behind the properties fronting on Route 1. If this preferred location is deemed to be infeasible or impractical, a route directly within the Rt. 1 ROW would be considered as a less preferable alternative. The total request is \$50,000.

DESTINATION TIF VILLAGE IMPROVEMENT

Sidewalk Ramp Detectable Panel Replacement: In the Village area, Staff recommends replacing existing sidewalk ramp “detectable panels” which will be phased over the next four or five years. Existing sidewalk ramp detectable panels in the Village area, which are required to have “truncated domes”, do not meet current ADA requirements, and need to be replaced. In some locations, Staff will also raise the ramps slightly to reduce the ponding of water where it occurs. Each year, Staff will look to replace eight to ten of these panels, made of coated cast iron, which is the design with the longest anticipated lifespan. The total request is \$6,000.

Sidewalk Improvements: Sidewalk improvement projects are proposed on Southwest side of School Street, Main Street to Middle Street (4500 square feet). The total request is \$45,000.

Freeport Economic Development Corporation: Historically, the council has allocated funding to FEDC as an investment in economic development in Freeport and in the partnership with FEDC as the vehicle for pursuing the community’s economic development goals. This year, FEDC is asking for continued funding out of TIF Funds. The total request is \$100,000.

FY 2020 CAPITAL PROGRAM BACKUP DATA - EXPLANATION OF DEPARTMENTAL NEEDS & REQUESTS

EVALUATION CRITERIA

- A** Critical Replacement - item is past useful life and may be in failure. Failure of item WILL impact critical department mission or services. Items should generally be replaced before reaching this level.
- B** Non-Critical Replacement Needed - item is past useful life and may be in failure. Failure of item DOES NOT impact critical department mission or services. Items should generally be replaced before reaching this level, but may have been postponed due to funding availability.
- C** Regular Scheduled Replacement - approaching end of useful life - replacement needed within next 1 - 5 years. Most capital replacements should occur when item is in this category.
- D** Working Order - replacement not expected over next 5 years
- E** New Item - needed in order to expand current department mission or offer new services. Generally NOT critical item.

FUNDING SOURCES

- AMBR Ambulance Reserve
- FDR Fire Department Reserve
- PDR Police Department Reserve
- PIR Public Infrastructure Reserve
- PWR Public Works Reserve
- GAR General Admin Reserve
- BMR Building Maintenance Reserve
- BCR Boards and Committees Reserve
- RCR Recycling Reserve

ABBREVIATIONS USED

- Part. Partial - this represents only a partial replacement date or cost for this item. Replacement costs may be spread across several years, or this item may be replaced in phases.
- Est. Estimate - Date or cost for this item is estimated. Historical data may not be available for this item. Staff has estimated dates or cost for this item, which may not be exact.
- Rehab. Rehabilitation only - Equipment was rehabilitated instead of replaced. Rehabilitation generally results in a shorter expected service life when compared to replacement
- Indef. Indefinite - Long-term buildings and items that are not expected to be replaced in their totality within the foreseeable future
- Var. Varies - Item may consist of several subitems or pieces of equipment with varying replacement dates or costs.
